

Invitation

To participate in the conference:

“Science for Industry: Necessity is the mother of invention”

*Second Networking Event in the field of modern techniques
in geosystem exploration*

organized by the Institute of Geological Sciences
of Polish Academy of Sciences (ING PAN)
within the framework of ATLAB project
on September 18th – 20th, 2013

Ladies and Gentlemen,

We kindly invite you to participate in the conference devoted on the development and strengthening of collaboration among scientific and industrial sectors in the wide area of application of modern geochemical methods for geosystem exploration.

This is the second of three planned conferences of the “networking event” type, which are dedicated to different types of private and governmental companies and research institutions connected with wide aspects of exploration of geological environment, exploration and sustainable utilization of natural resources, exploration, utilization and protection of groundwater resources together with mineral and thermal water.

This Second Event will be focused on the application of modern techniques in geosystem exploration, utilization and protection.

Various aspects of legal and official possibilities of science-industry collaboration, funding opportunities as well as scientific research commercialization will be presented and discussed.

Also the newest, cutting-edge research opportunities in the Institute of Geological Sciences will be introduced and presented.

Adam Porowski

.....
Dr Adam Porowski
ING PAN
Main Organizer, ATLAB Project

Conference objectives:

- 1) Learning of important aspects concerning the ways and possibilities of financial support acquisition for joint scientific-industrial ventures and projects in Poland and European Union.
- 2) Familiarization of participants with the most modern techniques of research on geosystem exploration applied in the Institute of Geological Sciences (ING PAN), with special focus on stable and radioactive isotopes and geophysics.
- 3) Familiarization of participants with variable problems connected with sophisticated works, research and legal aspects during hydrocarbon exploration and utilization in different geological systems and social environments.
- 4) Learning about actual demands for innovative research and technologies in the field of geological recognition and environmental system description;
- 5) Seeking possibilities of mutual collaboration among scientific and industrial sector in various forms, e.g. large innovative projects with external financial support, consulting, analytical services, experts' reports, etc.
- 6) The newest analytical equipment, sampling and measurement technologies for environmental applications available on the market: companies presentations and exhibitions.

Organizers:

The set of conferences "Science for Industry: Necessity is the mother of invention" is organized within the framework of ATLAB project (*Action Towards Laboratories Enhancement and Know-How Exchange For Advanced Research on Geosystem*) sponsored by the 7th Framework Program of EU and performed in the Institute of Geological Sciences of the Polish Academy of sciences (ING PAN).

Organizing committee:

dr Adam Porowski, ING PAN, WP6 Leader, ATLAB Project

prof. Marek Lewandowski, Director ING PAN, ATLAB Project Coordinator

prof. Jan Środoń, ING PAN, Kraków Research Centre

mgr Katarzyna Walczyk, Research & Innovation Office (RIO), ATLAB Project

mgr Elżbieta Gogacz, ING PAN, ATLAB staff

mgr Małgorzata Penkala, ING PAN, ATLAB staff

mgr Agnieszka Arabas, ING PAN, ATLAB staff

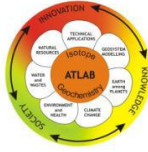

Conference venue:

Conference Hall, Instytutu Nauk Geologicznych Polskiej Akademii Nauk (ING PAN), Warsaw Research Center

Twarda 51/55

00-818 Warszawa, Poland

date: 18 – 20 September, 2013

Additional information:

Participation in the conference is free of charge.

The number of participants is strictly limited to the invited persons.

On-line registration will be possible and additional e-mail will be sent.

We offer help in hotel booking close to the ING PAN.

Detailed program of the conference is in process; will be updated regularly.

See the website: <http://www.atlab.eu>

Registration or other questions you can ask here:

adamp@twarda.pan.pl

tel. +48 (22) 6978756

tel. mobile: +48 601234349

Who is invited?

- director and/or other representative of National Centre for research and Development (NCBiR)
- director and/or other representative of National Science Centre (NCN)
- director of the Institute of Geological Sciences (ING PAN)
- directors and/or representatives of particular departments of the Polish Geological Institute (PIG PIB), Ministry of Environment, Ministry of Science and Higher Education, Polish Oil and Gas Company (PGNiG S.A.), KGHM Polish Copper S.A., Institute for Oil and Gas (INiG), National Contact Point (KPK), etc.
- representatives of private companies of oil industry, e.g. Chevron, Aurelian, Chemostrat, Serinus, Lotos-Petrobaltic;
- scientific staff of the Institute of Geological Sciences (ING PAN), laboratory managers and known specialists in the fields of geochemistry, geology, geophysics, ecology, etc.
- researchers and specialists from other well known scientific centers, e.g. AGH, Warsaw University, Lublin University, etc.
- representatives of Top 500 Innovators Program;
- representatives of the best Technology Transfer Offices in Poland;
- specialists from other countries, e.g. Alabama Geological Survey, USA; CEO of the PELA GeoEnvironment, etc..

Oral presentations and contributions:

Selected participants will be asked for giving 15 – 45 min oral presentation; topic and time of presentation will be appointed individually;

Official languages: Polish and English
